

bet your way

The 3/2 plan is a bet on both bets at once. Three chips are placed on Red, Black, Odd and Even, and two chips are placed on one of the three columns. The theory is that you will win one of the bets and lose the other. This is a good bet to make when you are in a losing streak. You can also use this bet to hedge your bets. For example, if you are betting on Red and Black, you can also bet on Odd and Even. This way, you will always have a winning bet.
