If you're trying to install an Xbox game from a disc and the installer process stops at or near 0%, this could be caused by the console trying to download an update for the game while the console is in a power-off state. To resolve this, you can try the following steps:

- Ensure the console is fully powered off.
- Wait for at least 30 minutes.
- Power the console back on and try installing the game again.

For more information, visit the Xbox support page: [Xbox Support: Game installation issues](#)
