

sportingbet 91

Odds of +200 mean you can win \$100 on a \$100 bet, but there's no quick-way to determine the implied winning probability! If the odds are appearing as fractional odds: 2/1

You could quickly solve for the implied probability using this formula:

$$\frac{1}{\text{Numerator} + \text{Denominator}} \times 100\%$$

What does this mean in sports betting? -
