Betting on Super Spin Roulette Live

It's important to understand the two main bet types

in Super Spin Roulette. Not least because one type will get

the benefit of the

multipliers and the other type will not.

The two bet types are:

Outside Bets These

are bets placed on the outside of the betting grid. These tend to be t

he Even Money

bets, like Red/Black, Odd/Even, High/Low and Column Bets an

d Dozen bets, which pay 2:1.

Inside Bets these are individual numbers or combinations

of numbers and have normal

payouts of between 35:1 to 5:1. It is these bets that multipliers

will be paid on, and

also the bets that have their normal payouts reduced (which pays for t) Tj T* BT /

The outside bets play as they do on a regular European Roule

tte table, so

there is no harm in playing those bets on the Super Spin ta

ble, you'll get the same

return.

The implications of playing the Inside bets and the impact the

multipliers have

on the payouts does need some explanation.

Inside Bets

Straight Up Bet This is a bet

where your chip covers one number on the betting grid. Ther

e are thirty-seven numbers

to choose from. You can place as many straight-up bets as y

ou like. The multiplier

payout will be for the full amount. Payout = Straight-up Bet amount x

Multiplier.

Split

Bet This is a bet where your chip covers two numbers so

half the amount is on one

number and half on the other. You cover two numbers with on

e bet. The multiplier payout

for a Split bet is half. Payout = Split-Bet amount x multip

lier divided by two.

Street

Bet Your chip covers three numbers across the betting grid

d. There are 12 rows to

place bets on. The multiplier payout for a Steet Bet is a third. Payout

= Street Bet

amount x Multiplier divided by three.

Corner/Basket bet This is a bet where you place
